Aman Singh

lethalcode2000@yahoo.com / 09162008243 / Ramgarh, Jharkhand

Summary

Innovative, task-driven professional with hands-on experience in web designing and web development across different technologies like blockchain development and has worked as a business relation associate by contributing values and evangelizing peers to engage and diversify over the field of Science with intelligence.

Acquaintance With

Ethereum Wallet

Ethereum Virtual Machine
As a blockchain enthusiast with a developer background, I have worked over the Ethereum blockchain where I have written smart contracts over the solidity where people can get connected and transact Ethereum P2P throughout the network and connects it with Metamask and etherscan to operate and get a record of our transaction faucet while connecting with blockchain nodes.

IPFS file system

Dstorage
The Dropbox application explores the interplanetary file system storage where people can come and connect their blockchain wallet to use the specified features of dropbox by uploading different format files and folders within an unbound restriction of data over the internet without being concerned about fraud tolerance and a user can share this valuable asset over the peer to peer network by generating an untrackable string at every point of data uploading session. https://github.com/Lethalcode69/IPFS-Dropbox-

Analytics

Power BI
Analyzing data through visuals and keeping a record of the market with the use of real-time data-driven analysis people could use it for their general analysis of the market showcasing the top 10 crypto asset by using Binance API.
